🔗 LeetCode

🌐 Portfolio

Summary

Full-stack Developer with strong expertise in React, Next.js, Node.js, and Express. Experienced with MongoDB, PostgreSQL, Docker and SQL. Skilled problem-solver with 550+ LeetCode and 320+ Codeforces problems solved. Passionate about building AI-driven, scalable web applications.

Education

University of Engineering and Technology

Lahore, Pakistan

B.Sc. in Computer Science (CGPA: 3.75/4.00)

2023 – 2027

Work Experience

MERN Intern

Sep 2025 – Dec 2025

Codev Digital

Remote, Pakistan

- Developed and deployed full-stack MERN applications with responsive UI, improving user experience and performance.
- Designed and implemented secure authentication using JWT and cookies, ensuring safe session management.
- Implemented Role-Based Access Control (RBAC) for multiple user roles, improving system security and access management.

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, C#

Frontend: React, Next.js, Tailwind CSS, Shadcn/UI

Backend: Node.js, Express.js, REST APIs, Authentication (JWT, OAuth)

Databases: MongoDB, PostgreSQL, SQL

Systems & Tools: Redis, Docker, Git, GitHub, Nginx, CI / CD

Core Concepts: Data Structures & Algorithms, OOP, Operating Systems, DBMS

Projects

QuickBlog (MERN, Gemini API, ImageKit, Redux Toolkit)

Live — GitHub

- Built a full-stack blogging platform with JWT-based authentication and secure media uploads via ImageKit CDN.
- Integrated Gemini API to generate AI-assisted blog descriptions and content suggestions.
- Developed admin dashboard with debounced search and role-based access control for efficient content moderation.
- Optimized client-side state management using Redux Toolkit to improve UI responsiveness and scalability.

SkillGauge (Gemini AI, Next.js, TypeScript, Prisma, PostgreSQL, AWS S3)

GitHub

- Built an AI-powered interview preparation platform featuring ATS resume scoring, mock interviews, and personalized feedback generation.
- Implemented resume parsing and job-description matching pipelines to generate role-specific interview questions using Gemini AI.
- Developed an automated answer evaluation engine that scores responses and generates actionable improvement suggestions.
- Designed analytics dashboards to track interview performance, skill progression, and preparation trends over time.

Real-Time Chat Application (MERN, Socket.IO, Redis, Docker)

GitHub

- Designed and implemented a real-time messaging system using Socket.IO supporting low-latency message delivery
- Built a Redis-based presence and pub/sub system to track online users and synchronize state across concurrent connections.
- Containerized backend services using Docker, enabling consistent environments and simplified deployment.

Hisabkaru (Next.js, SaaS, Shadcn UI, Auth Systems, Zustand)

Codev Digital Internship

- Developed a full-stack SaaS POS platform with modular architecture for managing products, orders, and sales analytics.
- Designed authentication flows including email verification, password reset, and Google OAuth with secure session handling.
- Built a centralized dashboard for real-time sales tracking, receipt generation, and business insights.
- Implemented inventory management with low-stock alerts and best-selling product analytics to assist decision-making.

Achievements

ICPC Asia Regional Finalist

Feb 2026

Qualified among top teams nationwide to compete in ICPC Asia Regional Finals.

Runner-up, UTS 6.0 Programming Contest

Feb 2026

2nd place among 30 teams by solving 4 out of 5 problems.

Runner-up, Brainiac'25

Dec 2025

Secured 2nd position by solving all 4 problems in the competition.

Runner-up, Cosmocon'25

Nov 2025

2nd place among 75 teams by solving 5 out of 6 problems.

Top 25, Digital Ignite Speed Programming

Jul 2025

Qualified from 1400+ teams in first round and secured Top 25 position in on-site final round at GIKI.
